

Sound Masking Solutions for Educational Institutions

PROTECT STUDENT PRIVACY

Protecting your students' privacy isn't just an add-on - it's the law. The Family Educational Rights and Privacy Act (FERPA) mandates that post-secondary institutions take all reasonable efforts to safeguard student information including how the information is collected, stored, used, and released. Many institutions have established effective security measures to protect the data stored on their servers, but overlook the need to safeguard client information during its collection and use. Sound masking solutions help protect speech privacy by making it more difficult to overhear people speaking.

REDUCE NOISE DISTRACTIONS

In addition to providing a more secure and private environment for your students, sound masking can also help reduce distractions. Adding sound masking to your libraries, student centers, classrooms, and other study spaces will ensure minimal disruptions to students while they are studying or taking tests.

CAMPUS LOCATIONS THAT BENEFIT FROM SOUND MASKING:

Dean of students office
Financial aid office
Campus bank
Health center
Student counseling center

Dorm corridors
Admissions department
Career development office
Campus safety
Registrar's office

Professor's offices
Residential life office
Study halls
Computer rooms
Libraries

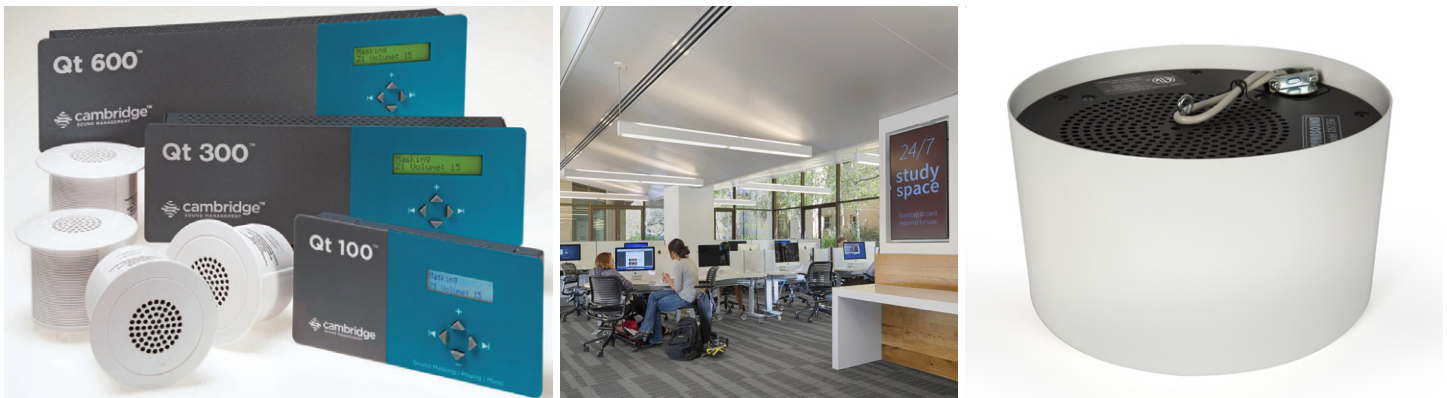

WHAT IS SOUND MASKING?

Sound masking is the addition of an unobtrusive specially engineered background sound to an environment, similar to the sound of airflow, that reduces the intelligibility of human speech and decreases distractions. The sound is typically emitted through speakers installed in or above the ceiling. The resulting environment is more productive, private, and comfortable.

SOUND MASKING SYSTEMS FROM CAMBRIDGE SOUND MANAGEMENT

Cambridge Sound Management offers the best performing masking technology that can meet the needs of any architectural space. Our commitment to delivering superior products and service has made us far and away the world's largest provider of sound masking solutions.

Our systems are installed in hundreds of millions of square feet and are trusted by over half of the Fortune 100. They are easy to install in both new construction and retrofits, and can contribute to LEED Certifications.
