

Hugs® Infant Protection

SOLUTION OVERVIEW

#1 trusted infant security system worldwide

SOLUTION BENEFITS

- **Single standard of care.** Know your most precious patients are protected anywhere in the hospital.
- **Easy to use.** The easiest system to work with from single sign on (SSO) and tag application through transporting to discharge.
- **Adapts to clinical workflows.** Accessible at the bedside, auto-enrolls tags when band is attached, auto-cancels transfers, and includes management tools and compliance reports.
- **Alerts at your fingertips.** Gives staff essential information at workstations or mobile devices.
- **More layers of security.** Continual supervision, out-of-unit alerts, “off-line” mode for exits, and more.
- **Access to Clinical Specialists.** Our team of maternity RNs provides training, product support and peer-to-peer help.

CHALLENGES

Infant abductions have happened at hospitals of all sizes and types all over the world. And the risks are rising. It's not just stranger abductions and mother/infant mismatches. Hospitals must be ready for modern patient security challenges, from family abductions to pediatric patient flight and even cyberthreats. These realities make individual protection of each patient essential for every hospital.

SOLUTION

Our Hugs Infant Protection solution offers the most advanced and secure protection from a single department to the entire hospital. Every infant wears a Hugs tag that is attached to the ankle with a special tamper-detecting band. The tag activates as soon as attached and is automatically enrolled in the system. From that moment on, the infant is safeguarded throughout your campus.

More than 1,780 hospitals worldwide rely on the Hugs solution to help them deliver the highest level of safety. It's why Hugs is the global #1 infant security system, protecting over 2 million infants each year.

“Nobody wants to be called for a Code Pink. But if there were an event, you really need a system to be able to track the baby throughout the hospital. This is the direction everybody needs to go in.”

– Diane Hitchens, BSN, RN, CNML
Director, Women's & Children's Services
TidalHealth Peninsula Regional

Advanced security meets simplicity: significant advancements to help clinical and security staff better protect newborns against modern security risks

Peace of mind from proven performance

Hugs offers advanced protection for infants and pediatric patients from a single department to the entire hospital

PROTECTION FOR ALL

Hugs is in use today to protect not just well newborns, but pediatric patients of all ages and NICU babies at open-crib stage.

MORE LAYERS OF PROTECTION

No other system swaddles infants in more protection. Hugs continually watches over each infant the moment a tamper-detecting tag is attached, with all exits guarded in Labor and Delivery, Postpartum, the NICU and Pediatrics.

SCALABLE TO ANY HOSPITAL

Hugs provides effective and scalable protection. It's the right choice whether supporting a 20-bed critical access hospital or a large urban medical center with thousands of births a year.

MOTHER/INFANT MATCHING

The Kisses® component for Hugs is the only automatic and audible baby match support to traditional ID bands. It brings peace of mind for nurses and moms.

ENTERPRISE COVERAGE, ENTERPRISE IMPACT

The Hugs solution is built using the most advanced enterprise software and hardware technology that can be used across one or multiple locations. You can have confidence that your infants will have the highest level of security.

The Hugs solution is just one part of Securitas Healthcare's real-time visibility platform that includes Staff Protection, Asset Management, Temperature Monitoring, Staff Workflow, Patient Flow, and more.

CLINICAL EDUCATION & SUPPORT SERVICES

Comprised of experienced maternity nurses and patient safety experts, Securitas Healthcare's Clinical Services team empower nurses and other caregivers with the training and knowledge to be the best defense of your infants' safety.

We also offer support materials to help prepare your hospital for the most comprehensive infant protection, including parent pamphlets, sample policies and planning resources, and online training courses.
