**Securitas Healthcare**

# Asset Management

## SOLUTION OVERVIEW

# Reduce costs and transform management of mobile assets

## SOLUTION BENEFITS

- **Cost savings.** Real-time inventory visibility helps right-size fleets to reduce purchases and rentals. Shrinkage control saves thousands of dollars annually.

- **Caregiver efficiency.** Eliminate the stress of hunting for a needed device—and the hoarding that often results. Slash search times to as little as 2 minutes.

- **Improved patient care.** Ensure critical equipment is available and maintained properly. Retrieve recalled assets within hours—before they're used on a patient.

- **Increased asset utilization.** Total visibility to where each asset is used improves asset allocation, optimizing utilization with real-time PAR Level management.

- **Endless possibilities and coverage.** One solution for many technologies: active RTLS, RAIN RFID, Low Frequency for choke-point, Ultrasound for room-level accuracy.

- **BLE-supported infrastructure.** Our BLE solution provides a lower cost asset tag ideal for smaller hospital equipment, using existing infrastructure or supplemental, lower cost infrastructure.

- **Unified platform advantage.** Supports scalability, interoperability, analytics, lower cost of ownership and more.

## CHALLENGES

Hundreds of hours spent searching for equipment. High-value assets lost, stolen or misplaced. Poor utilization. Unnecessary rentals and purchases. Delays in patient care as caregivers wait for what they need.

## SOLUTION

Automates manual processes for managing capital and rental equipment so staff can easily see the location and status of assets in real time. Capture and analyze data about how assets are being used—and apply those insights to make better in-the-moment decisions and long-term improvements. Integrate with CMMS and Infusion Management solutions to extend visibility and deepen understanding of equipment distribution, utilization and allocation.

## HOW IT WORKS

Secure a tag to valuable equipment for location visibility. Tags communicate wirelessly with the MobileView® platform. Asset location and status are automatically logged and monitored, using visual controls on PCs or mobile devices to quickly find assets and plan workflows.
Configurable, real-time alerts provide notification for any status or location change such as IV pump replenishment requirements, shrinkage alerts, or maintenance needs.

Asset data is transformed into powerful reporting to better understand inventory levels, PAR Level performance and asset utilization.

# The value of advanced Asset Management

**90%**
REDUCTION
in time searching
for equipment

**$1.4M**
SAVED by avoiding
equipment loss and
replacement costs

**100%**
DEVICE REMEDIATION
within 5 days for 800
infusion pump fleet

**100%**
COMPLETION pump
monthly maintenance
in less than a week

**$250K**
INITIALLY SAVED
avoiding purchase
of more pumps

**66%**
REDUCTION in delays
in patient care due to
available infusion pumps

**$42K**
SAVINGS PER YEAR
reducing unnecessary
rental of specialty beds

**30**
MINUTES
MORE TIME a nurse
spends on care if
pumps are available

*BEST IN KLAS® REAL-TIME LOCATION SYSTEMS (RTLS) 2023*

"The Securitas Healthcare solutions are so important and easy to use that we made sure everyone at TidalHealth, including our CEO, has access to the applications."

– Mark Cornelius, Director, Clinical Engineering, TidalHealth Peninsula Regional
